

## TABLE OF CONTENTS

CONVERSION FACTORS	MATHEMATICS (Cont.)
1 Metric Conversion Factors	41 Circumferences and Areas of Circles
7 Greek Letters and Standard Abbreviations	53 Lengths of Chords for Spacing Off the Circumferences of Circles
7 Decimal Equivalents of Fractions of an Inch	54 Hole Coordinate Dimension Factors
9 Use of Conversion Tables	55 Spacing Off the Circumferences of Circles
10 Fractional Inch to Millimeter	69 Diameters of Circles and Sides of Squares of Equal Area
11 Decimals of an Inch to Millimeters	70 Distance Across Corners of Squares and Hexagons
13 Millimeters to Inches	71 Formulas for Regular Polygons
15 Microinches to Micrometers	72 Areas and Dimensions of Figures
16 Micrometers to Microinches	78 Segments of Circles
17 Thermal Energy or Heat	80 Volumes of Solids
17 Thermometer Scales	86 Ratio and Proportion
17 Absolute Temperature and Absolute Zero	87 Inverse Proportion
17 Thermal Energy	88 Powers, Roots, and Reciprocals
17 Fahrenheit-Celsius Conversion	88 Powers of Ten Notation
MATHEMATICS	101 Solution of Triangles
20 Mathematical Signs and Commonly Used Abbreviations	102 Trigonometric Relationships of Right Triangle Parts
21 Arithmetic	102 Angular/Linear Relationships
21 Common Fractions	103 Trigonometric Functions
22 Adding Fractions and Mixed Numbers	105 Solution of Triangles
22 Subtracting Fractions and Mixed Numbers	110 Degree to Radian Conversion Table
23 Multiplying Fraction and Mixed Numbers	112 Trigonometric Functions
23 Dividing Fractions and Mixed Numbers	113 Laws of Sines and Cosines
24 Decimal Fractions	113 Trigonometric Identities
25 Converting Common Fractions To Decimal Fractions	118 Versed Sine and Versed Cosine
27 Principal Algebraic Expressions and Formulas	118 Sevolute and Involute Functions
27 Solving First Degree Equations	119 Involute Functions Table
28 Solving Quadratic Equations	123 Compound Angles
28 Cubic Equations	123 Formulas for Compound Angles
29 Rearrangement and Transposition Formulas	ENGINEERING DRAWINGS
30 Complex or Imaginary Numbers	126 Fundamental Rules
31 Operations on Complex Numbers	127 Units of Measurement
32 Imaginary Quantities	127 Types of Dimensioning
33 Squares and Cubes of Numbers	128 Application of Dimensions
39 Fractions of Pi	133 Dimensioning Features
40 Weights and Volumes	145 Direct Tolerancing Methods
	146 Tolerance Expression
	147 Interpretation of Limits
	147 Single Limits
	147 Tolerance Accumulation

## TABLE OF CONTENTS

---

### ENGINEERING DRAWINGS (Cont.)

---

- 156 Geometric Tolerance Symbols
- 159 Feature Control Frame Placement
- 160 Definition of Tolerance Zone
- 160 Tabulated Tolerances
- 161 Drafting Practices
- 161 Sizes of Drawing Sheets
- 161 Control and Production of Surface Texture
- 163 Symbols for Section Lining
- 167 Sampling Lengths
- 168 Roughness Parameters
- 168 Waviness Parameters
- 169 Surface Roughness to Tolerances
- 170 Roughness Measurements
- 172 Surface Texture Symbols
- 174 Roughness Average Values
- 174 Lay Symbols
- 177 Surface Texture of Castings
- 177 Metric Dimensions on Drawings
- 177 Checking Drawings

---

### INSPECTION

---

- 180 Measuring Instruments
- 180 Steel Rules
- 182 Micrometers
- 185 Verniers
- 187 Dial Calipers
- 187 Protractors
- 189 Sine-bar
- 191 Tables for Sine-bar Constants
- 198 Measuring Tapers
- 198 Measuring Dovetail Slides
- 199 Angles and Tapers
- 200 Tapers per Foot
- 201 Figuring Tapers
- 201 Simplified Taper Calculations
- 204 Measurement over Pins

---

### ALLOWANCES AND TOLERANCES FOR FITS

---

- 205 Limits and Fits
- 205 Basic Dimensions
- 205 Tolerances
- 208 Preferred Basic Sizes
- 211 ANSI Standard Fits
- 214 Running and Sliding Fits
- 216 Clearance Locational Fits

---

### ALLOWANCES AND TOLERANCES FOR FITS (Cont.)

---

- 218 Transition Locational Fits
- 222 Modified Standard Fits
- 223 Tolerances Designation
- 225 Preferred Metric Sizes
- 225 Preferred Fits
- 228 Hole Basis Metric Clearance Fits
- 230 Hole Basis Metric Transition and Interference Fits
- 232 Shaft Basis Metric Clearance Fits
- 234 Shaft Basis Metric Transition and Interference Fits
- 236 Gagemakers Tolerances

---

### PINS

---

- 238 ANSI Straight Pins
- 238 ANSI Taper Pins
- 239 Drilling Specifications
- 241 Selection of Number and Sizes of Drills
- 242 ANSI Grooved Pins

---

### STANDARD TAPERS

---

- 245 Morse Taper
- 245 Brown & Sharpe Taper
- 245 Jarno Taper
- 246 Morse Stub Taper Shanks
- 248 Morse Taper Sleeves
- 249 Brown & Sharpe Taper Shank
- 250 Jarno Taper Shanks
- 250 Machine Tool Spindles
- 250 Tapers for Machine Tool Spindles

---

### KEYS AND KEYSEATS

---

- 253 Key Size Versus Shaft Diameter
- 256 Depths for Milling Keyseats
- 256 Cotters
- 257 Plain and Gib Head Keys
- 258 Fits for Parallel and Taper Keys
- 259 Key Chamfer
- 259 Keyseat Tolerances for Electric Motor
- 259 Set Screws for Use Over Keys
- 259 Woodruff Keys and Keyseats
- 262 Keyseat Dimensions for Woodruff Keys
- 264 Depth of Keyseat
- 265 Preferred Lengths of Keys

## TABLE OF CONTENTS

<b>SCREW THREAD SYSTEMS</b>	<b>GEARS AND GEARING (Cont.)</b>
266 Screw Thread Forms	329 Caliper Measurement of Gear Tooth
266 Parts of a Screw Thread	330 Involute Gear Milling Cutter
267 Thread Designations	331 Chordal Thickness and Chordal Addenda of Milled and Gear Milling Cutter
269 Cutting Screw Threads	332 Finishing Gear Milling Cutters
271 Tap Drill Sizes and Percentage of Thread	333 Module System Gear Design
278 Threading Formulas	333 German Standard Tooth Form
278 Internal Metric Thread	334 Rules for Module System of Gearing
280 External Metric Thread	335 Tooth Dimensions Based Upon Module System
283 Standard Series Selected Combinations	336 Equivalent Diametral Pitches, Circular Pitches
307 Measuring Screw Threads	337 Spur Gear Calculations Formula
307 Pitch and Lead of Screw Threads	338 Helical Gear Calculations Formula
307 Thread Micrometers	340 Bevel Gear Calculations Formula
308 Ball-point Micrometers	342 Milling Bevel Gears
308 Three-wire Method	
309 Classes of Formulas	
309 Screw Thread Profiles	
309 Checking Pitch Diameters	
310 Wire Sizes	
310 Diameters of Wires	
311 Measuring Wire Accuracy	
311 Measuring or Contact Pressure	
312 Formulas for Checking Pitch Diameters	
	<b>INDEXING</b>
	346 Milling Machine Indexing
	346 Simple Indexing
	347 Indexing Movements for Standard Index Plate
	348 Angular Indexing
	350 B & S Index Plates
<b>COMMON HARDWARE</b>	<b>CUTTING SPEEDS AND FEEDS</b>
313 Fastener Grade Marks	351 Work Materials
313 Grade Identification Marks and Mechanical Properties of Bolts and Screws	354 Cutting Speed, Feed, Depth of Cut, Tool Wear, and Tool Life
314 Hexagon and Spline Socket	354 Selecting Cutting Conditions
315 Drill and Counterbore Size	355 Principal Feeds and Speeds Tables
316 Hexagon and Spline Keys and Bits	355 Cutting Speed Formulas
317 Socket Head Cap Screws	357 Adjustment Factors for Turning with HSS Tools
320 Drill and Counterbore Sizes	357 Cutting Speed for Tapping
321 Hardened Ground Machine Dowel Pins	358 Cutting Speed for Broaching
	359 Cutting Speed for Thread Chasing
<b>GEARS AND GEARING</b>	360 Feed Rate for Milling
322 Gears	361 Feed Rates for Drilling
323 Definitions of Gear Terms	363 Cutting Speeds for Plain Carbon and Alloy Steels
327 Sizes and Shape of Gear Teeth	365 Cutting Speeds for Ferrous Cast Metals
327 Nomenclature of Gear Teeth	
328 Properties of the Involute Curve	
329 Diametral and Circular Pitch Systems	

## TABLE OF CONTENTS

<b>CUTTING SPEEDS AND FEEDS (Cont.)</b>	<b>TOOL WEAR (Cont.)</b>
366 Cutting Speeds for Stainless Steels	415 Diamond Wheels
367 Cutting Speeds for Tool Steels	417 Peripheral Versus Flat Side Grinding
368 Cutting Speeds for Light Metals	417 Lapping Carbide Tools
368 Cutting Speeds for Titanium Alloys	417 Chip Breaker Grinding
369 Cutting Speeds for Superalloys	418 Summary of Miscellaneous Points
370 Feeds for Milling with HSS Cutters	
375 RPM for Various Cutting Speeds and Diameters	
379 Tapping and Threading	
380 Speeds for Metal-cutting Saws	
381 Speeds for Turning Unusual Materials	
<b>CUTTING TOOLS</b>	<b>CUTTING FLUIDS FOR MACHINING</b>
382 Tool Contour	419 Types of Cutting and Grinding Fluids
382 Terms and Definitions	419 Cutting Oils
386 Relief Angles	420 Water-Miscible Fluids
386 Rake Angles	420 Cutting Fluids for Different Materials and Operations
388 Nose Radius	421 Cutting Fluids for Turning, Milling, Drilling and Tapping
388 Chipbreakers	422 Cutting Fluids for Machining Operations
389 Planing Tools	423 Application of Cutting Fluids to Carbides
389 Indexable Inserts	424 Cutting Fluids for Machining Magnesium
390 Insert Identification System	424 Coolants for Carbide Tool Grinding
392 Indexable Insert Tool Holders	
392 Standard Shank Sizes	
394 Indexable Insert Holders	
398 Single-Point Turning and Boring Tools	
401 Arbor-Mounted Side and Slot Mills	
404 High-Speed-Steel Peripheral and Slotting End Mills	
406 High-Speed-Steel Twist Drill Tool	
409 Length of Point on Twist Drills	
410 Tool Troubleshooting	
412 Machining Methods	
<b>TOOL WEAR</b>	<b>MACHINING NONFERROUS METALS</b>
413 Sharpening Twist Drills	425 Machining Magnesium
413 Relief Grinding of the Tool Flanks	426 Machining Aluminum
414 Drill Point Thinning	427 Machining Plastics
414 Sharpening Carbide Tools	429 Machining Non-metallic Gear Blanks
415 Silicon Carbide Wheels	430 Zinc Alloy Die-Castings
	430 Monel and Nickel Alloys
	431 High Strength, Low Alloy Steel
	<b>MATERIALS</b>
	433 Carbon Steels
	435 Free Cutting Steels
	435 Carburizing of Steels
	438 Chromium Nickel Austenitic Steels
	439 Stainless Chromium Irons and Steels
	442 Unified Numbering System
	444 Standard Steel Numbering System
	445 Classification of Tool Steels

## TABLE OF CONTENTS

<b>MATERIALS (Cont.)</b>		<b>MATERIALS (Cont.)</b>	
446	Quick Reference Guide for Tool Steel Selection	467	Aluminum and Aluminum Alloys
447	Molybdenum High-Speed Steels	468	Temper Designations for Aluminum Alloys
449	Tungsten High-Speed Tool Steels	471	Designation Systems
450	Hot-Work Tool Steels	473	Composition of Casting Alloys
451	Cold-Work Tool Steels	474	Clad Aluminum Alloys
452	Shock-Resisting, Mold, and Special-Purpose Tool Steels	474	Characteristics of Principal Aluminum Alloy Groups
453	Classification, Compositions, and Properties of Tool and Die Steels	475	Cast Magnesium Alloys
455	Heat Treatments for SAE Carbon Steels	475	Wrought Magnesium Alloys
456	SAE Alloy Steels	477	Nickel and Nickel Alloys
460	Composition and Physical Properties of Bronzes	479	Inconel
461	Wrought Copper and Copper Alloys	479	Titanium and Titanium Alloys
461	Aluminum Bronze Rods, Bars, and Shapes	480	Powder Metallurgy
462	Hardness and Ultimate Strength of Brass	<b>HARDNESS TESTING</b>	
465	Copper-Silicon and Beryllium Copper Alloys	482	Brinell Hardness Test
465	Nominal Composition and Properties of Everdur	482	Rockwell Hardness Test
		483	Shore's Scleroscope
		483	Vickers Hardness Test
		483	Knoop Hardness Numbers
		484	Monotron Hardness Indicator
		484	Keep's Test
		484	Comparative Hardness Scales for Steel
		489	Creep
		489	Creep Rupture
		489	Identifying Metals
