

# Table of Contents

## Introduction

About this book	Intro-1
About the Author	Intro-1
Create a template	Intro-2
Opening a template	Intro-4
Configuring your system	Intro-5
Customizing your wheel mouse	Intro-13

## Lesson 1

Display Multiple Drawings	1-2
How to configure AutoCAD to display Multiple Drawings	1-2
How to close a drawing	1-2
How to change from tiled to cascade	1-2
Warm up drawings	1-4
Note to Instructors	1-4
Exercises 1A, 1B, 1C	1-5
Review Plotting from Model Space	1-8

## Lesson 2

How to customize a toolbar	2-2
Modify and Rename	2-2
Create	2-3
How to Restore the default toolbars	2-4
How to Customize the Status Bar	2-5
REDO multiple commands	2-6
Understanding User Profiles	2-8
Exercises	
2A - Create a new profile	2-9
2B - Importing a User Profile	2-14

## Lesson 3   Decimal Setups

Exercises	
3A - Create a Decimal Setup Drawing	3-2
3B - Create a Border for Plotting	3-7
3C - Create a Viewport	3-11
3D - Create a Page Setup for 11 x 17 sheet	3-13
3E - Create a Layout & Border for 24 x 18 sheet	3-15
3F - Create a Page Setup for 24 x 18 sheet	3-20
3G - Create a Layout & Border for 24 x 36 sheet	3-22
3H - Create a Page Setup for 24 x 36	3-27
Printing with Letter Size Printer	3-30

## Lesson 4   Feet and Inches Setups

Exercises	
4A - Create a Feet-Inches Setup Drawing	4-2
4B - Create an Architectural Border for Plotting	4-7
4C - Create a Viewport & adjust scale	4-11

4D - Create a Page setup for 24 x 18 sheet	4-12
4E - Create a Layout 1/4"=1'	4-14
4F - Create a Layout 1/8"=1'	4-16
4G - Move & Delete Layout tabs	4-18
4H - Experimenting with the Layouts	4-20

## Lesson 5

Multiline	5-2
Justification, Scale and Style	5-3
Creating	5-4
Loading	5-6
Editing	5-7
Double Line (LT only)	5-8
Exercises	
5A - Create a Multiline Style	5-10
5B - Draw a Multiline	5-11
5C - Trimming a Multiline	5-12
5D - Create a Floor plan using Multiline	5-13
5E - Create a Floor plan using Double Line	5-14

## Lesson 6

Isometric drawings	6-2
Isometric snap and grid	6-2
Isoplanes	6-2
Isometric Ellipse	6-3
Exercises	
6A - Isometric Assembly	6-4
6B - Isometric Object	6-5
6C - Abstract House	6-6

## Lesson 7

Copy, Cut and Paste	7-2
Draw Order	7-4
Dimensioning an isometric drawing (Oblique)	7-5
Isometric text	7-6
Exercises	
7A - Copy and Paste between two drawings	7-7
7B - Oblique dimensioning	7-8
7C - Abstract House	7-9
7D - Isometric Text	7-10

## Lesson 8

Block	8-2
Creating	8-2
Inserting	8-4
Attributes	8-6
Creating	8-6
Exercises	
8A - Assigning Attributes to a Block	8-10
8B - Assigning Attributes to Multiple Blocks	8-14

## **Lesson 9**

Editing Attributes	9-2
Extracting Attributes	9-6
Excel Files	9-9
Exercise	
9A – Extracting Attributes	9-10

## **Lesson 10**

DesignCenter	10-2
Drag and Drop Hatch Patterns	10-5
Drag and Drop Layouts, Text Styles, etc.	10-6
DC Online	10-7
Tool Palettes	10-8
Exercise	
10A---Inserting Blocks from one drawing to another	10-13
10B---Inserting Symbols from the AutoCAD today library	10-15
10C---Inserting a hatch pattern from the DesignCenter	10-16
10D---Create a Tool Palette	10-17

## **Lesson 11**

External Referenced drawings (XREF)	11-2
Inserting	11-3
Manager	11-5
Xbind	11-6
Clipping an External Referenced drawing	11-8
Clipping options	11-9
Editing an External Referenced drawing	11-10
Convert an object to a Viewport	11-12
Creating Multiple Viewports and Multiple Xrefs	11-13
Non-continuous Linetype scales within Viewports	11-16
Exercises	
11A - Xref Multiple Drawings	11-17
11B – Creating Multi-scaled views	11-21
11C – Unload, Reload and Detach an Xref drawing	11-23
11D –Clipping an External Reference	11-25

## **Lesson 12**

Ordinate dimensioning	12-2
Creating	12-3
Jog	12-4
Qdim and ordinate	12-5
Alternate units	12-6
Tolerances	12-7
Geometric tolerances	12-9
Geometric tolerances and Qleader	12-10
Datum feature symbol	12-11
Datum triangle	12-12
Typing Geometric Symbols	12-13
Exercises	
12A - Ordinate dimensioning	12-14
12B - Dual dimensioning	12-15
12C - Deviation & Symmetrical	12-16

12D - Limits	12-17
12E - Geometric tolerances	12-18

### **Lesson 13**

Introduction to 3D	13-2
Viewing a 3D model	13-4
Hiding Lines	13-5
Wireframe model	13-6
Surface model	13-7
Solid model	13-8
Exercises	
13A - Create a Wireframe Model	13-9
13B - Create a Surface Model	13-10

### **Lesson 14**

Constructing Solid Primitives	14-2
Box, Sphere, Cylinder, Cone, Wedge, Torus	
Exercises	
14A – Create 4 Solid Boxes	14-9
14B – Create a solid Sphere	14-10
14C – Create 3 solid Cylinders	14-11
14D – Create 2 solid Cones	14-12
14E – Create 3 solid Wedges	14-13
14F – Create 3 solid Torus'	14-14

### **Lesson 15**

Understanding the UCS	15-2
Moving the UCS	15-3
Rotating the UCS	15-4
New direction for Z axis	15-5
Drawing with two viewports	15-6
Plan View	15-7
Boolean Operations	15-8
Union	15-8
Subtract	15-9
Intersection	15-10
Exercises	
15A – Subtract	15-11
15B – Union	15-13
15C – Moving the UCS	15-15
15D – Assembling 3D solids	15-16

### **Lesson 16**

Extrude	16-2
Region	16-5
Polyline “Join” option	16-6
Exercises	
16A – Extrude	16-7
16B – Extrude with taper	16-8
16C – Extrude along a Path	16-10
16D – Extrude a Region	16-11
16E – Join and Extrude a Region	16-12

## **Lesson 17**

3D Operations	17-2
Mirror	17-2
Rotate 3D	17-3
Align	17-4
3Darray	17-5
Exercises	
17A – Mirror 3D	17-7
17B – Rotate 3D	17-9
17C – Align	17-10
17D – 2D Array	17-11
17E – 3D Array – Rectangular	17-12
17F – 3D Array – Polar	17-13

## **Lesson 18**

Solidedit	18-2
Extrude faces	18-3
Move faces	18-4
Offset faces	18-5
Delete faces	18-6
Exercises	
18A – Extrude faces	18-7
18B – Move faces	18-8
18C – Offset faces	18-10
18D – Delete faces	18-12

## **Lesson 19**

Revolve	19-2
Slice	19-3
Section	19-4
Exercises	
19A – Revolve	19-5
19B – Slice	19-7
19C –Section	19-8
19D –Hatch the Section	19-9

## **Lesson 20**

Plotting Multiple views	20-2
How to control the hidden line plot	20-4
How to plot with a shade view	20-5
Dimensioning Multiple views	20-6
Exercises	
20A – Multiview plot setup	20-7
20B – Invisible Hidden Lines	20-8
20C – Visible dashed hidden lines	20-9
20D – Display a shaded view	20-10
20E -- Dimensioning	

## **Lesson 21**

Create a Table	21-2
How to Insert a Table	21-4
How to modify an existing Table	21-5

How to Create a Field	21-7
How to Update a Field	21-8
How to Edit a Field	21-9
Exercises	
21A—Create a Table	21-10
21B—Draw a Table	21-11
21C—Modify an existing Table	21-12
21D—Add Fields to an existing Table	21-13
21E—Update a Field	21-14

## **PROJECTS**

Architectural  
Electro-mechanical  
Mechanical

## **APPENDICES**

Appendix A. Add a Printer / Plotter  
Appendix B. How to Create a New “Color-dependent Plot Style” to be used  
without Lineweights  
Appendix C. Printing a quick draft on a letter size printer.

## **INDEX**
